Déposant WAVECOM		

1.	Le présent rapport préliminaire international sur la brevetabilité (chapitre I) est établi par le Bureau international au nom de l'administration chargée de la recherche internationale selon la règle 44bis.1.a).							
2.	Ce RAPPORT comprend un total de 7 feuilles, y compris la présente feuille de converture.							
	Dans les feuilles jointes, toute référence à l'opinion écrite de l'administration chargée de la recherche internationale doit entendue, à la place, comme une référence au rapport préliminaire international sur la brevetabilité (chapitre I).							
3.	Le présent rapport contient des indications relatives aux points suivants :							
	Cadre n° I	Base de l'opinion						
	Cadre n° II	Priorité						
	Cadre n° III	Absence de formulation d'application industrie	on d'opinion quant à la nouveauté, l'activité inventive et la possibilité Elle					
	Cadre n° IV	Absence d'unité de l'i	nvention					
	Cadre n° V	Déclaration motivée seion l'article 35.2) quant à la nouveauté, l'activité inventive et la possibilité d'application industrielle; citations et explications à l'appui de cette déclaration Certains documents cités						
	Cadre nº VI							
	Cadre n° VII	Certaines irrégularités	relevées dans la demande internationale					
	Cadre n° VIII	Certaines observations	relatives à la demande internationale					
4.		délai de 30 mois à compter	aux offices désignés conformément aux règles 44bis.3.c) et 93bis.1 de la date de priorité (règle 44bis.2), sauf si le déposant a présenté une					
			Date d'établissement du présent rapport 01 November 2006 (01,11,2006)					
	Purson international de l'OMPI		Fonctionnaire autorisé

Воз	No. I	Basis of this opinion
I.		regard to the language, this opinion has been established on the basis of the international application in the language in which it was unless otherwise indicated under this item.
		This opinion has been established on the basis of a translation from the original language into the following language
		, which is the language of a translation furnished for the purposes of international search (under
		Rule 12.3 and 23.1(b)).
2.		regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed titon, this opinion has been established on the basis of:
	a.	type of material
		a sequence listing
		table(s) related to the sequence listing
	Ь.	format of material
		in written format
		in computer readable form
	c.	time of filing/furnishing
		contained in the international application as filed.
	Ì	filed together with the international application in computer readable form.
	ľ	furnished subsequently to this Authority for the purposes of search.
	1	Initialized dissequently to this relativity for the purposes of scales.
3.		In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filled or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filled or does not go beyond the application as filled, as appropriate, were furnished.
4.	Addit	ional comments:

1.	Statement				
	Novelty (N)	,	Claims	1-24	YES
			Claims		NO
	Inventive ste	ep (IS)	Claims		YES
		4	Claims	1-24	NO
	Industrial ap	pplicability (IA)	Claims	1-24	YES
		(Claims		NO

- 2. Citations and explanations:
 - 2. Reference is made to the following document:

D1: US 2003/081538 A1 (WALTON JAY R ET AL) 1 May 2003 (01-05-2003)

3. The present application fails to comply with the requirements of PCT Article 33(1) since the subject matter of independent claims 1, 19, 23 and 24 does not meet the criterion for novelty defined in PCT Article 33(2).

Document D1 describes (the references in parentheses apply to this document):

A system in which a supplementary channel is connected to a principal bidirectional symmetrical channel, the said principal bidirectional symmetrical channel comprising a principal uplink path and a principal downlink path (paragraph 26: "IS-95, cdma2000, IS-856, W-CDMA", etc.), ensuring particularly the transmission of data and signalling and control information at low or medium speed [see Section 1 below] (paragraph 28,

Box No. V

Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

first phrase), and at least one supplementary channel influenced only in the downlink direction ensuring particularly the transmission of data at a high speed [see Section 1 below], implementing a multi-carrier technique ensuring a distribution of data over space time / frequency (paragraph 1: "hybrid OFDM-CDMA") and having a sub-frame structure (paragraph 44: the OFDM signal in D1 consists of consecutive symbols, which correspond to "sub-frames" in the application), which includes a stage of synchronisation of the supplementary channel at the sub-frame level (paragraph 62: "OFDM symbol timing")

itself comprising the following stages:

- detection of a defined instant on the principal channel;
- obtaining the beginning of a sub-frame in the supplementary channel, by shifting the instant detected forward by an given interval of time, which is not zero (paragraph 62: use of a pilot signal for synchronising the supplementary channel; paragraphs 55 and 122: D1 considers different embodiments for this pilot signal see paragraphs 118 to 121 to paragraph 122; it is mentioned however that this pilot signal, derived from the principal channel, can be repeated periodically at a lower rate than that of the symbols the knowledge and use of the shift time is therefore implicit, as it is not possible to see how the system could function otherwise).

The subject matter of claim 1 differs from D1 in that

International application No. PCT/FR2005/000319

Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

the said supplementary channel is <u>only</u> affected in the downlink direction, whereas in D1 the supplementary channel is used in both the <u>uplink and downlink</u> directions (paragraphs 72 to 92 for the discussion of the up transmission on the supplementary channel). Whether or not a channel working in <u>upwards</u> direction using a multi-carrier technique is <u>present</u> or <u>absent is irrelevant to the solution of the problem to be solved</u>, which is the synchronisation of the channel of the supplementary channel in a downwards direction.

4. Dependent claims 2 to 18 and 20 to 22 do not contain features, which combined with the features of any claim to which they refer, satisfy the requirements of the PCT with regard to novelty and inventive step (PCT Article 33 (2) and (3).

International application No.
PCT/FR2005/000319

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

1. The expressions "high speed" and "low or medium speed" are relative and do not define the scope of the claims which use them. Moreover, they are both preceded by the word "particularly", which indicates that the subject matter of the claims can be modified by the substitution of unspecified features.

Therefore claims 1 to 24 do not satisfy the requirement for clarity stipulated in PCT Article 6, as supplemented by the PCT Guidelines Section 5.34.
